PROJECTS & EXPERIENCE

JETA TECHSPIRE HQ

2023 - PRESENT

Lead Full-Stack Developer

- Spearheaded open-source initiatives and led a distributed team to design and build community-first web apps and tools solving real-world problems.
- Oversaw architecture, development, and deployment pipelines across multiple projects using PocketBase, React, Tailwind CSS, TypeScript, and Node.js.

Project Eden - Herbal Prescription Assistant

2024 - 2024

Lead Developer

- Designed and built a web-based assistant using Google Flan LLM and PocketBase backend to generate natural herbal prescriptions for user-submitted ailments.
- Prioritized offline-friendly, fully free tooling with user privacy and local medicinal knowledge preservation in mind.

Lineage Tracker App

2025- 2025

Marketing Manager & Specialist

- Developed a digital heritage tracker to map family history, relationships, and ancestral stories.
- Included dynamic tree visualization and structured relational data using PocketBase collections.
